Axiad

Axiad Cloud + Windows Hello for Business

Extend your authentication to every user, machine, and digital interaction

Windows Hello for Business will change how you secure your workforce – offering user-friendly, simple-to-use authentication for your employees' Windows devices and applications. The solution allows you to eliminate unsafe passwords for these use cases and begin your transition to passwordless with their multi-factor authentication solution.

So is your journey to passwordless complete? Not so fast… what about your employees that use MAC or Linux? What happens when you need to authenticate to Remote Desktop or VPN? And how can you verify the machines and devices on your network? It's time to maximize your Windows Hello for Business investment, with Axiad.

Axiad Cloud offers a single platform to manage all of your credentials, including Windows Hello for Business. With authentication for employees, machines, and devices all in one place, your journey to passwordless can be simple.

With Axiad and Windows Hello, you can authenticate…

Remote Desktop & VPN
- Associate your WHfB credentials with digital certificates to address additional use cases, without needing an on-premises Microsoft PKI

Any operating system
- MAC, Linux, and Windows are all supported in one centralized platform, so you can offer a vendor-agnostic option to your employees

Machines and devices
- Axiad Cloud's PKI as a Service lets you verify every mobile phone, IoT device, server, etc. on your network to prevent machine-based attacks

Digital interactions
- Extend certificates for digital signing and encryptions of your employee emails and documents to keep communication secure

Why should you manage Windows Hello for Business in Axiad Cloud?

Windows Hello for Business may accelerate your journey to passwordless, but doesn't guarantee a successful passwordless future. Enterprises need to choose a passwordless solution that not only meets their digital security needs but that empowers their users to take charge of their security. If you implement passwordless without putting your users front and center, they will be less likely to adopt your solutions in the long run. This is not only a waste of your investment but puts your business and data at risk.

That's why elevating Windows Hello for Business with Axiad is essential for passwordless success. The Axiad Cloud platform puts the user first and ensures that authentication is simple and secure every step along the way.

Multiple credentials made easy
- Your passwordless infrastructure could require additional smart cards, hardware tokens, etc. – use a single pane of glass to issue and manage them all

One click issuance for users
- Long and complex issuance processes lead to your employees reaching out to IT – instead give them a self-service portal to issue their own credentials in seconds

Streamlined infrastructure for IT
- With Axiad Cloud, IT no longer needs to spend time and money on maintaining separate platforms for Windows Hello for Business and their additional credentials

Automated MFA best practices
- If employees are procrastinating to issue or renew a credential, Axiad Airlock automatically sends them to their user portal to prevent them finding workarounds in your security policy

Verified emergency access
- You can't fully prevent lost or forgotten credentials, even with Windows Hello for Business – MyCircle allows employees to gain emergency access by verifying their identity with a trusted colleague

About Axiad

Axiad provides enterprises with its SMARTidentity solution to deliver complete trust across the identity spectrum. Whether you need to secure your employee access, their online interactions, or your machines and devices, SMARTidentity ensures zero trust with PKI, MFA, and FIDO in one platform – Axiad Cloud. Businesses can take an identity-first strategy to cohesively deploy and manage all their credentials such as certificates, mobile MFA, TPM, hardware tokens such as YubiKeys, smart cards, and biometrics. Axiad makes the journey to passwordless simple with user-centric solutions for credential issuance, lifecycle management and emergency access from anywhere. The SMARTidentity solution is trusted by Fortune 500 companies across healthcare, aerospace & defense, energy & oil, transportation, finance, and more.
